

What's Turnover Costing You?

57% Direct Costs

These costs include labor related costs benefits, insurance, tax, and the expenses of keeping an employee on your team.

43% Indirect Costs

The costs associated with turnover such as having to create new job postings, vacant positions and overtime hours.

38% Average Turnover

The average turnover rate in manufacturing is 38%, leading to constant replacement cycles and operational strain.

3x Lower Turnover Rate

Achieved by KFI Staffing's Unique Workforce Model.

The true cost of an employee goes far past their paycheck. When you factor in extra costs beyond base wage, the overall investment in each employee increases significantly. These hidden costs add up quickly, often without employers realizing the full financial impact.
